

Technical Delivery Manager

€45,000 - €55,000 per year

About PentaTk:

PentaTk is an Ireland-based technology services company delivering high-quality solutions across **Mobile Application Development, MERN Stack, and Laravel-based applications**. We partner closely with clients to build scalable, reliable, and business-driven digital products.

As we continue to grow, we are looking for an experienced **Technical Delivery Manager** to lead client engagements, manage delivery execution, and ensure successful outcomes across projects.

About the Role:

PentaTk is an Ireland-based tech services company working in **Mobile App Development, MERN Stack, and Laravel**. We are looking for a **Technical Delivery Manager** who can own client interactions, translate business requirements for BA and engineering teams, and ensure timely, high-quality delivery of projects.

This is a **client-facing leadership role** ideal for professionals with strong services-sector experience.

Key Responsibilities

- Act as the **primary client interface** during project delivery
- Coordinate with development teams across **Mobile, MERN Stack, and Laravel** technologies.
- Ensure adherence to scope, quality standards, timelines, and budgets.
- Identify delivery risks early and implement mitigation strategies.
- Leverage AI tools to improvise
- Oversee sprint planning, milestones, release management, and final handover.
- Translate business requirements into technical tasks and priorities.
- Ensure clarity of requirements and smooth execution across teams.
- Support teams in removing blockers and optimizing delivery processes.
- Implement and maintain delivery best practices (Agile/Scrum preferred).
- Ensure documentation, reporting, and delivery standards are followed.
- Continuously improve delivery efficiency and client satisfaction.

Required Experience & Skills

- 10 years of proven experience in IT services delivery

- Strong background in client-facing roles within the IT services sector.
- Solid understanding of:
 - Mobile Application Development (iOS/Android/Flutter/React Native – any)
 - MERN Stack
 - Laravel-based web applications
- Strong understanding and practical usage of AI tools for improvement of delivery tracking and reporting and productivity and quality improvements.
- Hands-on experience working with Business Analysts and translating business requirements into technical deliverables.
- Strong project management skills with experience in Agile/Scrum methodologies.
- Excellent communication, negotiation, and stakeholder management skills.
- Ability to manage multiple projects and priorities simultaneously.
